

W-STRAP ROCK SUPPORT PLATES

DESCRIPTION

W-straps are used to support fractured ground between rock anchors by providing a continuous steel plate between the bolts. W-straps may be bolted to the rock by two or more rock anchors and tends to conform to major surface irregularities.

FEATURES

- Large surface containment area for fragmented rock
- Provide a continuous barrier
- Are available in a range of lengths
- Manufactured from hot rolled commercial grade mild steel
- Evenly spaced holes for bolting

DIMENSIONS

WIDTH	LENGTH	PLATE THICKNESS	HOLE DIAMETER	HOLE SPACING
265 mm	0.3m - 5.0 m	1.6 mm	40 mm	500 mm
